ABOUT ME

I recently completed my studies in Computer and Information Science after three years of hard work, graduating in June 2023. Throughout my education, I gained hands-on experience in both backend and frontend development, with expertise in a wide range of technologies, including Bootstrap, Angular, React, Vue, Node, React Native, Django, and Flask. My optimism, energy, motivation, and loyalty are characteristics that define me both personally and professionally. With a strong foundation in object-oriented programming, interaction design, UX, and usability principles, I'm confident in my ability to create effective, sustainable and engaging digital experiences. I am a quick learner and always maintain a positive and flexible attitude. Whether it's expanding my existing knowledge or diving into unknown technologies, I'm always motivated to improve.

WORK EXPERIENCE

Bachelor Thesis 2023 – 2023

NordAxon | Malmö

NordAxon has developed Emely, an AI-powered MLaaS language learning assistant designed to enhance language skills in Swedish. As key contributors to the project, my colleague and I were primarily responsible for conducting comprehensive evaluations of Emely's overall user experience and usability. These evaluations involved engaging with real users to gather valuable insights and feedback to further enhance Emely's performance and user satisfaction.

Store Manager 2018 – 2023

BIKBOK Emporia | Malmö

As a Store Manager, I held a multifaceted role, overseeing all aspects of store operations. I diligently tracked sales figures, managed budgets, and maintained comprehensive statistics to ensure optimal performance. An integral part of my responsibilities involved scheduling, recruiting, training, supervising, and evaluating personnel to foster a capable and motivated team.

Sales Representative 2014 – 2016

Hallon, 3 | Stockholm, Phaphos

As a Sales Representative with customer responsibility, I provided exceptional customer service by assisting customers with various needs. This included efficiently handling invoices, offering technical support, and facilitating the sales of comprehensive solutions tailored to meet their specific requirements.
